

HIGH WATER SAFETY BULLETIN

Credit Valley Conservation
1255 Old Derry Road, Mississauga, ON, L5N 6R4
Telephone: (905) 670-1615 Fax: (905) 670-2210

Issued to: Municipalities, Police, Emergency Services, School Boards, Media,
Local Conservation Authorities, CVC Staff and Board Members

Date: October 19, 2011

Time: 09:00 A.M.

A low pressure system from the Southern United States will bring moderate amounts of precipitation. Rain will gradually spread across south-Central Ontario on Wednesday. The rain will become heavy at times Wednesday evening for south-Central Ontario. The rain is expected to taper off Thursday morning with lighter rain continuing Thursday. The forecast calls for up to 50 mm of rain when the system exits our region.

The forecasted precipitation may result in some minor flooding of low lying areas along the watercourse in our watershed. As well, heavy downpour may result in flash flooding in highly urbanize areas. Areas adjacent to watercourses, especially near culverts and intake structures, may become dangerous because of the high flows and should be avoided. Please alert any children under your care of these dangers and avoid areas with high flows.

CVC will continue to closely monitor weather and water levels in the watershed. The High Water Bulletin will be in effect through Friday, October 21, 2011 or until further notice.

For more information on this high water safety bulletin, please contact the following person at (905) 670-1615 ext. 269. In the event of an afterhours flood emergency, please call 416-328-4908.

Jeff Wong
Flood Duty Officer

NOTE: High Water Safety Bulletin is a general notice issued when potential conditions exist that poses a risk to personal safety. It is issued when streams are at or near bank full levels, when ice conditions are unsafe, or when stream banks are icy, soft, and/or slippery.
