RUBBER STAIR TREADS & MID AND UPPER LANDINGS

SUPPLIERS:

- | | |
|------------------------|---|
| 1. Virtr by Johnsonite | 3. Activa Rubber Flooring by PRF Canada |
| 2. Spextones by Flexco | 4. Norament 925 Grano by Nora Rubber Flooring |

- Upper landing[s] from interior stairwell screens and entire mid landing[s] are to be hammered finish rubber tiles (minimum 600 x 600) in a "marbleized" or a "speckled" finish and cove base.
- The first tread of the upper and mid landing is to be a rubber stair tread (without the continuous riser upstand, but matching tread/riser) with "contrasting" visual strip. (Preference is for yellow strip. Black strip is unacceptable.)
- Tread and riser with "rondels" on tread as well as the "contrasting" visual strip at edge of stair is to be one piece. (Edge to edge between stringers)
- Ground floor is to be ceramic tile with ceramic tile base.
- Tread/riser abutting steel stringers is to be caulked to prevent water penetration below the rubber material.
