

Immunization Information for School Children

All students under 18 years of age, newly registering to a school in the Region of Peel must provide a record that shows they are immunized against **diphtheria, tetanus, polio, measles, mumps and rubella** according to the Ontario Immunization Schedule, or provide proof of a valid exemption.

Peel Public Health must — by law — keep and update the immunization record for your school-aged child throughout your child's school years¹.

When enrolling your child in a school:

- Attach a copy of your child's immunization record to the Immunization Records Form for Registrants to School. The school will send the record to Peel Public Health.
- Check that the copy of the record includes **all** of the immunization doses your child has received since birth.
- See your family doctor or call Peel Public Health if your child has not been immunized or you do not have a record of your child's immunizations.

Immunize on time

- Between four to six years of age your child needs a booster dose for diphtheria, pertussis, tetanus and polio².
- Ten years after the four to six year booster your child needs a booster dose for diphtheria, pertussis and tetanus².
- Immunizations must be given at the right times to work. For example, the first dose of MMR (measles, mumps and rubella) must be given **after** a child's first birthday and the second dose at least 28 days after the first dose².

Did You Know?

- Once your child is registered for school, **you must update your child's immunization record with Peel Public Health** each time your child is vaccinated.
- Peel Public Health regularly reviews student immunization records to make sure that students have all the required immunizations.
- Students whose immunization records are not up to date (and do not have a valid exemption) might not be allowed to attend school.
- A child who has been immunized outside of Ontario or Canada might need additional immunizations to meet Ontario's provincial immunization laws.
- Immunizations required to attend school in Ontario are **free** through your family doctor.
- Peel Public Health will translate a child's immunization record that is not in English **for free**.
- A school-aged child who does not have an Ontario Health Card but needs an immunization record to attend school can get immunized **for free** at Peel Public Health immunization clinics.

2. Canadian Immunization Guide. 7th Edition. 2006. Published by the Public Health Agency of Canada. : 93/95&196/200.

Keep Your Child's Immunization Record Up to Date

- Neither your doctor nor your child's school reports your child's immunization information to Peel Public Health.
- Once your child is registered for school, **you must update your child's immunization record with Peel Public Health** each time your child is vaccinated.
- **Call** Peel Public Health at 905-799-7700; Caledon residents can call toll-free at 905-584-2216. **Translation services are available.**
- **Visit** www.ImmunizePeel.ca to report your child's immunization record online.

Other Important Immunizations

Peel Public Health has in-school immunization clinics to give hepatitis B and meningitis vaccinations to students in Grade 7 and human papilloma virus vaccinations to students in Grade 8. Information with details about immunizations offered at school is sent home to parents of students in those grades.

Influenza immunization is offered every year by Peel Public Health at community locations and by Peel physicians. Flu viruses change so it's important for you and your children to be immunized every year.

Parents, remember that immunization is important throughout the lifespan. Talk to your doctor or call Peel Public Health to learn more about vaccinations you should have.

Questions?

If you have any questions about immunizations for you and your family call Peel Public Health at 905-799-7700. Caledon residents can call toll-free at 905-584-2216.

February 1, 2011

Dear Parent/Guardian/Student:

You are receiving this letter because Peel Public Health **does not** have a complete record of this student's immunizations. **We need you to update this student's immunization records before February 16, 2011 online or by fax or phone.** Students who continue to have incomplete immunization records will not be allowed to attend school.

What you need to do:

Step 1:

Review the vaccines listed in the second line of Section B on the yellow form. Dose(s) of these vaccines are missing from this student's record.

Step 2:

Review the Routine Immunization Schedule for Ontario on the back of this letter and compare it to this student's record in Section A of the yellow form. Check to see if this student is missing vaccine dose(s) for his/her age. The vaccines highlighted on the immunization schedule are mandatory.

Step 3:

Review the questions on the back of the yellow form if you are unsure why the vaccines listed in Section B are missing from this student's record. If you're still unsure what dose(s) are missing, please call Peel Public Health at 905-799-7700.

Step 4:

Visit your family doctor or walk-in clinic to get any doses this student may be missing of the mandatory vaccines listed in Section B.

Step 5:

Report all vaccine doses this student has received, which are missing from his/her record, to Peel Public Health. **Update your records by using only one** of the following ways:

- Report them online at www.ImmunizePeel.ca
- Fax records to 905-565-0426 (Attention: Immunization Records)
- Call 905-799-7700 (Caledon residents call 905-584-2216)

Please call Peel Public Health if you have any questions or need help in updating this student's immunization record.

Sincerely,
Peel Public Health
