

Ways to Expand and Enhance Your Educational Experience

Alternative Education Programs

Students entering secondary school are registered into mainstream courses. At various points, students can choose “ways to expand and enhance their educational experience” through Cooperative Education, OYAP (Ontario Youth Apprenticeship Programs), Program Pathways, and/or Specialized High Skills Major Programs.

For students who struggle with the traditional learning environment and require an alternative program or setting to re-engage in school, an Alternative Education Program may be recommended. Entry to a school or district/board level Alternative Education Program involves consultation with school staff. Please see the diagram and chart below for an overview of the critical path and district/board programs.
