

Capital Priorities

On an annual basis the Ministry of Education requests submissions from school boards identifying their top capital construction priority needs through a [Capital Priorities](#) funding request submission. School boards have an opportunity to submit up to a maximum of eight (8) business cases identifying the highest and most urgent pupil accommodation needs. The Board of Trustees is required to approve the list of capital priorities for submission. Subject to Board approval staff files a Capital Priorities form for each approved project, in addition to preparing a business case in support of each priority. Both the Capital Priorities form and the business cases provide a scope of work, enrolment information, development information, existing accommodation situation, renewal and facility condition data, new child care needs and other relevant information supporting the request.

Listed below are Capital Priority funding requests and Ministry approvals:

2010 - [Report](#)

School Consolidation Capital

The Ministry of Education recognizes the need to support capital funding projects of school boards that address excess capacity through consolidations. Similar to Capital Priorities requests, on an annual basis the Ministry of Education requests submissions from boards through the [School Consolidation Capital](#) funding request for up to eight (8) projects. The Ministry will consider funding projects that support and address the board's excess capacity.

Listed below are School Consolidation Capital funding requests and Ministry approvals:
