

FACILITIES RENEWAL

Capital Expenditure – Accessibility Improvements

The board receives an allocation for Facility Renewal projects annually. These funds are intended to keep buildings and grounds up to date, in good working condition and capable of providing the facilities needed for program delivery. As part of the Facility Renewal there are specific programs established for accessibility improvements for buildings and grounds to accommodate special needs users. For example, barrier free construction and signage, elevators and stage lifts and other unique accommodations. In addition there are elevator and stage lift repair and replacement programs established to upgrade and replace the units that have come to the end of their life cycle in order to avoid safety issues and meet AODA requirements.
