Welcome to our NEW Regional STEM Program Enroll your child today!

Robotics - Science - Innovation - Technology - Engineering - Math

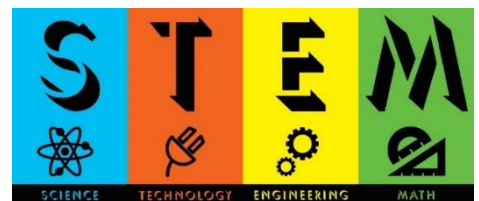

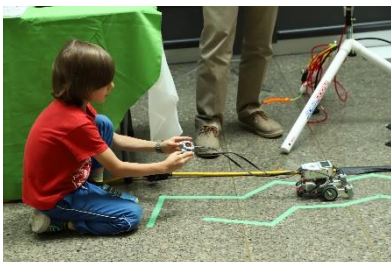

The STEM Montessori Academy of Canada (SMAC) offers programming designed to enable children access to the best resources and education in science and technology based instruction.

SMAC's regional STEM club - STEM (Science, Technology, Engineering and Math) provides hands on science, engineering and technological activities while fostering social skills through engaging educational instruction. As STEM based education is essential in a world dominated by technology, this program is designed to position children as globally competitive individuals, skilled and experienced in science, technology, engineering, and math.

The regional STEM program is accessible in the form of after school programs, PD day camps, weekend clubs and camp programs offered during school breaks including winter break, march break, and summer break. Inclusive in nature, our affordable for all programming provides opportunities for minorities, females and newcomers who are currently underrepresented in STEM field careers.

Our programs focus on advanced teachings to compliment your child's existing educational experience. We offer applied math, coding, problem solving, robotics, physics, chemistry, biology and more to get students engaged in STEM field learning from an early age. Our courses foster problem solving skills, promote critical thinking, and provide hands-on experiential learning opportunities that enriches the overall educational experience.

Our advanced STEM programming is geared towards students from grades 1-12.

We offer a wide variety of Educational Camps, Weekend Clubs, After School & PD Day Programming!

After School Programs

We offer engaging and fun STEM based programs for students grade 1-12. Check out our newest offerings and get in touch with us today!

- Junior Coders
- Robotics & Automation
- Chemistry Biology & Physics
- Web Development

Our Camps & PD Programs include a variety STEM based learning experiences.

Weekend Club

For parents looking for exciting weekend programs for their student. We offer STEM based programming with options to add additional Arts and community-based activities!

Mini Ambassadors

Our Junior Ambassadors program engages students in their community with activities focused on social responsibility, community development and leadership.

STEM-Youth Connect Leadership Development Program

Beginning in February 2020, the STEM Academy of Canada will be offering our new Leadership Development Program to students Grades 5-12. Meeting monthly, students will engage in leadership development seminars and lectures taught by guest speakers and known leaders in a variety of STEM fields.

Registration opens December 20th!

Enriched Studied @ Queens University

Each Spring, students Grade 5-12 are offered a chance to immerse themselves in the complete university experience at the Queen's University in Kingston, Ont. They enjoy classes taught by Queen's professors all while staying in residence, eating in the dining halls, and making new friends with students from other schools.
