The scope of the work will include:

- Demolition of the existing building, including the eight classroom portapak;

- Modifications to the parking lot and driveway to include a kiss and ride and bus drop off on-site.

During the construction phase of this project, St. Anne students will be temporarily relocated to a host location which will begin September 2023.

Details of the planned accommodation strategy, including host locations, will be presented at a community information meeting, which will take place as follows:
