Once in a while you encounter a book where you really, really care about the characters and what happens to them. It's like you're the cheerleader and they're your team. This book was like that. We meet two people who get together romantically on the night of their graduation from university. Then they go off to find other partners, other jobs, and other places to live but always end up being in contact with each other. It is a kind of British version of *When Harry Met Sally* and has been made into a movie starring Anne Hathaway and Jim Sturgess. I have to tell you I could not put this book down. For forty-eight hours, all I could think about was whether Dexter and Emma would finally get together. Do they? You'll have to read it to find out. Oh! I forgot to mention – the book was so funny, the dialogue so hilarious that I found myself actually laughing out loud.
